

Remote Patient Monitoring & Chronic Care Management

Who is monitoring my vitals?

The QorumPartners Care Team consists of nurses, physicians, nurse practitioners, and medical assistants who will remotely monitor your vitals daily and provide education and intervention for the best possible outcomes.

How does the equipment work?

The equipment provided works like a cell phone; when your vitals are taken, they are automatically transmitted to QorumPartners for daily monitoring. This means you can take your devices with you anywhere you go!

Why?

With the fully managed Remote Patient Monitoring (RPM) service, your physician will have 24/7 visibility into your health, 365 days a year.

If you are interested in joining this program, please let your prescriber know! Should you have any inquiries about the QorumPartners service, don't hesitate to reach out to their customer service team.
